«Look to Norway»?

President Roosevelt and Crown Princess Märtha, at the delivery of Roosevelt's «look to Norway» speech in 1942.

Question raised

- ▶ Public confidence:
 - ▶ Experience: Norwegian process potentially not alleviating potential for concern from stakeholders
 - ▶ Lack of confidence creates challenges even in spatial model: Politics and real-world implications compete and may hamper innovation
 - ▶ One goal should be confidence in project-specific consequence assessments, even in spatial planning models
