 FOLLOW US

The venue

Island Residence is a traditional garden ambience right by the sea, an expansive outside space which is ideal for hosting our celebration for Global Wind Day 2024.

In Island Residence, olive trees dot the grounds while a rustic wine press and antique fragments of ceramic and marble complete the Greek style signature. Those details underline the reasons why this is the most popular place for summer events!

Reservations

Seats are available in order of priority according to demand. For details, please see the [relevant guidelines](#).

AEOLOS Awards

This year is also the year for the AEOLOS awards. The awards are given every two years to personalities with a special contribution to Wind Energy in Greece.

They were established in 2005. Since 2019, the award is an olive tree made of brass, clay and stone that has been blown by the northeast wind of the Aegean. It combines the Greek element of the olive and the sea with the power of the wind.

More information about the award and the winners to date may be found on the ELETAEN website <https://eletaen.gr/vraveia-aiolos/>

30 years from Law 2244 of 1994

2024 marks the 30th anniversary of Law 2244/1994. The law that allowed for the first time in our country the production of electricity by private entities, exclusively (at that time) from renewable energy sources.

A law, with 11 articles occupying only 7 pages in sheet A'168/1994 of the Government Gazette, brought about a small revolution by creating a new market which we have been serving for 30 consecutive years.

The 30-year anniversary since 2244 is another reason to celebrate the World Wind Energy Day in Greece with splendor this year.

Dear colleagues and friends,

We are doing our best, to organize a perfect event and celebrate together the Global Wind Day. Your participation supports and gives strength to ELETAEN. We hope to see you all in person.

On behalf of the Board of Directors

Panagiotis Ladakakos
President ELETAEN
